

OTAY WATER DISTRICT

BOARD OF DIRECTORS MEETING
DISTRICT BOARDROOM

2554 SWEETWATER SPRINGS BOULEVARD
SPRING VALLEY, CALIFORNIA

WEDNESDAY

August 2, 2006

3:30 P.M.

AGENDA

1. ROLL CALL
2. PLEDGE OF ALLEGIANCE
3. APPROVAL OF AGENDA
4. APPROVAL OF MINUTES OF THE JOINT AGENCY BOARD MEETING OF MAY 5, 2006
5. PUBLIC PARTICIPATION – OPPORTUNITY FOR MEMBERS OF THE PUBLIC TO SPEAK TO THE BOARD ON ANY SUBJECT MATTER WITHIN THE BOARD'S JURISDICTION BUT NOT AN ITEM ON TODAY'S AGENDA

CONSENT CALENDAR

6. ITEMS TO BE ACTED UPON WITHOUT DISCUSSION, UNLESS A REQUEST IS MADE BY A MEMBER OF THE BOARD OR THE PUBLIC TO DISCUSS A PARTICULAR ITEM:
 - a) REJECT MR. AND MRS. CARTER'S CLAIM
 - b) REJECT MR. AND MRS. INGHAM'S CLAIM
 - c) APPROVE GENERAL MANAGER SALARY SETTING AD HOC COMMITTEE'S RECOMMENDATION FOR THE GENERAL MANAGER'S SALARY FOR FISCAL YEAR 2007

INFORMATION / ACTION ITEMS

7. BOARD INFORMATION / ACTION ITEMS
 - a) DISCUSSION OF 2006 BOARD MEETING CALENDAR

REPORTS

8. GENERAL MANAGER'S REPORT
 - a) UPDATE ON THE 30" RECYCLED WATER PIPELINE PROJECT (SEE ATTACHMENT "A")
 - b) SAN DIEGO COUNTY WATER AUTHORITY UPDATE
9. DIRECTORS' REPORTS / REQUESTS
10. PRESIDENT'S REPORT / REQUESTS
11. CLOSED SESSION
 - a) CONFERENCE WITH LABOR NEGOTIATOR – (GOVERNMENT CODE §54957.8)
AGENCY DESIGNATED REPRESENTATIVE: DAN CASSIDY
 - b) PUBLIC EMPLOYEE APPOINTMENT – (GOVERNMENT CODE §54957.6)
TITLE: GENERAL COUNSEL

RETURN TO OPEN SESSION

12. TERMINATE THE RETAINER AGREEMENT WITH BURKE WILLIAMS AND SORENSEN, LLP AND APPROVE THE RETAINER AGREEMENT FOR GENERAL COUNSEL AND SPECIAL LEGAL SERVICES WITH GARCIA CALDERON RUIZ, LLP EFFECTIVE AUGUST 1, 2006
13. REPORT ON ANY ACTIONS TAKEN IN CLOSED SESSION. THE BOARD MAY ALSO TAKE ACTION ON ANY ITEMS POSTED IN CLOSED SESSION
14. ADJOURNMENT

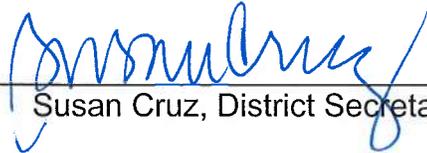

All items appearing on this agenda, whether or not expressly listed for action, may be deliberated and may be subject to action by the Board.

If you have any disability which would require accommodation in order to enable you to participate in this meeting, please call the District Secretary at 670-2280 at least 24 hours prior to the meeting.

Certification of Posting

I certify that on July 28, 2006, I posted a copy of the foregoing agenda near the regular meeting place of the Board of Directors of Otay Water District, said time being at least 72 hours in advance of the regular meeting of the Board of Directors (Government Code Section §54954.2).

Executed at Spring Valley, California on July 28, 2006.

Susan Cruz, District Secretary

AGENDA ITEM 4

MINUTES OF THE JOINT MEETING OF THE BOARDS OF DIRECTORS OF
HELIX WATER DISTRICT, LAKESIDE WATER DISTRICT, OTAY WATER DIS-
TRICT, PADRE DAM MUNICIPAL WATER DISTRICT, RIVERVIEW WATER DIS-
TRICT AND SWEETWATER AUTHORITY

OTAY WATER DISTRICT
2554 Sweetwater Springs Blvd.
Spring Valley, CA 91978

May 5, 2006

The meeting was called to order at 10:13 a.m. by President Bonilla of the Otay Water District.

ROLL CALL – EACH BOARD

Helix Water District:

Directors John Linden, Chuck Muse, and DeAna Verbeke

Lakeside Water District:

Directors Eileen Neumeister and Bruce Robertson

Otay Water District:

Directors Jaime Bonilla, Larry Breittfelder, Gary Croucher, Jose Lopez and Mark Robak

Padre Dam Municipal Water District:

Directors Joel Anderson, Lex Bosell, Jesse Dixon and Andy Menshek

Riverview Water District:

No Directors present.

Sweetwater Authority:

Directors Jim Alkire, Mitch Beauchamp, Jim Doud, Ron Morrison, Bud Pocklington and Margaret Welsh

Also present was staff from each agency.

APPROVAL OF AGENDA

A motion was made by Director Pocklington, seconded by Director Robak, and unanimously carried, to approve the agenda.

PUBLIC PARTICIPATION – OPPORTUNITY FOR MEMBERS OF THE PUBLIC TO SPEAK TO THE BOARD ON ANY SUBJECT MATTER WITHIN THE BOARDS’ JURISDICTION BUT NOT AN ITEM ON TODAY’S AGENDA

No one wished to be heard.

ACTION ITEMS

1. Water Conservation

Water Conservation Summit by CWA

Mr. Mike Urhammer, Communications Manager of Padre Dam, indicated that last summer the agencies’ General Managers held three roundtable discussion sessions on water conservation chaired by General Manager Augie Caires of Padre Dam. The outcome of their discussions was presented in August to the County Water Authority Board of Directors. The group committed to saving 100,000 acre feet of water per year through conservation by 2030. A Water Conservation Summit was proposed to bring key industry and stakeholders together to develop an action plan to reach the water savings goal. The focus will be to save by reducing outdoor water use. It is planned that a summit would be held annually with a different focus every year.

The Water Conservation Summit has been scheduled on September 28, 2006 at the Joan Croc Center at the University of San Diego. The goal of saving 100,000 acre feet a year (or 10% decrease in water use) will be presented to the summit attendees. A pre-event industry survey will be forwarded requesting their top five ideas for reducing water use in their business or industry. Their ideas will be presented and discussed at the summit. A draft “Strategic Plan for San Diego County Water Conservation” will be developed from their input/discussions and the draft will be distributed for comment and feedback. The role of the summit in the future of water conservation is to teach outdoor conservation to customers step-by-step.

Mr. Urhammer indicated that there have been conversations over the past few months about adopting a California Friendly Landscaping Ordinance. It would be passed by municipalities and it is believed it would be the most efficient way to promote conservation. He noted that AB2717 is being proposed in Sacramento and should it pass, it will require cities to adopt outdoor water conserving landscaping standards as per bill requirements. Should this bill pass the Water Conservation Garden will be essential to developers, architects, nurseries, landscape contractors and residents to demonstrate and teach how 10% water savings can be met.

Water Conservation Garden:

Director Mark Robak, Otay Water District and President of the Water Conservation Garden (WCG), presented an overview on the WCG: what they are currently doing and where they plan to go. He stated the garden's mission:

Promoting water conservation in the southern California landscape through excellent exhibits and programs that educate and inspire the public.

and noted that the garden provides 4.5 acres of professionally designed and landscaped water-wise plant material that is on display 7 days a week. He shared that a new Oak Grove display will be incorporated into the garden very shortly and a future Children's Garden will be developed. He reviewed some of the things the garden provides which included the following:

- A wide range of efficient irrigation technology display
- A professionally trained staff that is available to lead tours and answer questions
- Materials (plant lists, nursery lists, books, CD's, some plants, etc.) are available
- Classes are offered throughout the year for the general public on a wide range of gardening projects
- Classes for the landscaping industry are taught in plant selection and irrigation
- Special events are offered throughout the year (plant sales, Spring and Fall Festivals, Irrigation Technology Expo, etc.) targeting a broader market
- Biweekly tours of the garden for the general public; scheduled tours for both adults and school children
- Host groups from throughout the U.S. and internationally that are interested in learning from what we are doing (recognized as best of its kind west of the Mississippi River)
- A partnership with Cuyamaca College, including collaborations on special events, a potential new water-wise AA degree program and a new children's garden
- Educational displays, lectures, and activities at off-site locations throughout the County (i.e., Del Mar Fair, Earth Day, Career Days)

He stated that the garden was always reviewing ways in which their programs can be maintained more cost effectively. The garden's goal is to focus the garden's budget on programs that are most effective in influencing the reduction of water use in the landscape. He presented the results of the Otay Water District's survey concerning the WCG which included:

- Half the people that visited the Garden made a change to their landscaping/irrigation after their visit

- Almost half (45%) have seen or heard about the Garden
- Of those who have visited the Garden during the past six years, 34% have visited 2-3 times and 10% have visited 4-5 times which indicates that people are returning to the garden after visiting (the garden is reaching its audience)

Director Robak also shared that garden attendance has risen from 7,500 in FY99-00 to 27,000 in FY05-06. He noted that water conservation was the cheapest source for new water. He stated for this reason, he believed that it was important to increase spending for such programs to seek the water savings.

He indicated that the Garden has increased grant funding through private and public foundations and donations and expects to raise \$213,000 in grant funding and private/public foundation donations (outside of partner agency support funds) this fiscal year. The garden also raises funds through:

- New classes that are now offered to the landscaping industry for a fee
- Increased garden facility rentals (the garden is also seeking legislation to allow alcohol to be served on the garden facilities for special events such as weddings)
- A new community foundation, "Friends of the Garden"

Director Robak indicated that the Garden has five fulltime employees and 40 volunteers (docents). He stated that the value of the docent volunteers is over \$50,000 per year (at a rate of \$14/hour). He shared that 76% of the Garden's budget is utilized to pay employee salaries and benefits and 24% is used for general expenses. It is expected that salaries and benefits will increase 11.4% in FY06-07 which includes a 3.6% CPI, 2.5% merit pay increases and additional hours/benefits for three part time staff members. Non-water agency sources will increase from 12% to 15%.

He noted that the garden's future goals which were to better promote its conservation message to a wider audience in San Diego County and Southern California and to expand existing programs and exhibits. The garden hopes to increase grant funding and possibly hire a professional grants writer. It also plans to work with nurseries and garden/home improvement stores to stock and promote water-wise plants and hopes to institute a new water-wise AA degree program at Cuyamaca College and expand it throughout San Diego County.

2. East County Regional Water Treatment Improvement Program Update

General Manager Mark Weston of Helix Water District indicated that the East County Regional Water Treatment Improvement Program came about from the efforts to convert the Levy Water Treatment Plant into more of a regional facility. It was agreed that to change it to a regional plant, CWA would need to purchase additional capacity from Helix so that they would own more of the capacity from the treatment plant and Otay WD, Padre Dam MWD and Lakeside WD would need to do some im-

provements to take water from the plant. The program would expand the existing Levy Water Treatment Plant and add new facilities for additional treated water capacity. He stated that Helix WD, Otay WD and Padre Dam MWD would be executing an agreement with CWA in May 2006 and Lakeside WD is pending a deannexation and would also be executing an agreement.

Under the agreements, CWA will purchase existing capacity within Levy from Helix WD (up to 15 MGD in 2015) and will commit to providing water capacity to Levy from the Moreno-Lakeside Pipeline. They will also purchase capacity from Helix for Otay and Padre/Lakeside to take flow in 2008 and provide funding for the Los Coches Pump Station, 42" Flume Improvement, Otay #14 Flow Control Facility (FCF) and the Otay 36" pipeline. Helix has committed to provide an additional 6 MGD to Padre/Lakeside, design and construct the new Los Coches Pump Station and the new 42" flume improvement by 2008. Padre Dam will provide funding for the Los Coches Pump Station and design and construct the #7 flow control facility and pump station and the pump station and pipeline connected to #7 flow control facility by 2010. Otay has committed to design and construct the FCF #14 upgrade and the 36" treated water pipeline from the Otay FCF #14 to the Otay Regulatory Reservoir by 2010. Finally, Lakeside will design and construct the Lakeside FCF by 2008.

He stated that the program would provide better capacity and contain cost for the expansion for delivery systems to meet customer needs.

3. Desalination

Proposition 50 Applications:

General Manager Dennis Bostad of Sweetwater Authority indicated that it is proposed that a brine disposal line be constructed that will collect concentrated saline water that is a by-product of ocean or groundwater desalination from the Reynolds Groundwater Desalination Facility and the proposed Otay River Groundwater Desalination Plant. He stated that the line would join the South Bay Ocean Outfall line where the saline water will be diluted with reclaimed water prior to being released to the ocean.

He stated that Reynolds produces 4 MGD of desalinated groundwater (20% of Sweetwater's average day's supply demand) and releases, as a by product of desalination process, 1 MGD of concentrated saline water into the Sweetwater River channel which flows to the ocean. He stated that Sweetwater was planning on expanding Reynolds' capacity to 5 MGD, however, the Department of Health Services could provide a grant up to \$5.5 million to support the expansion of the plant up to 9 MGD. He stated that Sweetwater has been studying the groundwater basin for the past 5 years to see if there were sustainable supplies to meet a 9 MGD flow without creating new environmental issues. He stated that if the established safe yield from the basin was less than the 9 MGD yield capacity, they intend to look into seawater desalination to make up the difference. The saline con-

centrate for such a process, however, would go from 9000 PPM to 70,000 PPM (ocean water is about 35,000 PPM), thus, discharging through the Sweetwater River would no longer be permitted. He indicated that Sweetwater has submitted a Prop 50 grant application to do a study of their existing treatment plant. A proposed study would be to evaluate zero liquid discharge technology. However, the process is still under research and could be quite costly. The other option would be to construct the brine disposal line. However, it is felt that one plant could not support the construction of such a pipeline. It is proposed that a Prop 50 study be submitted to study the possibility of a regional brine disposal line and Sweetwater is working with other agencies (Otay, CWA and the City of San Diego) who may have projects that could hook into a regional line. The City of San Diego has two projects that would have the possibility of supporting a regional line and Otay may have one project.

Padre Dam Director Jesse Dixon inquired what determines viability. General Manager Bostad indicated that Sweetwater has a couple of monitoring wells and is proposing others that are highly specialized and can test water quality, pressures, and through satellite technology, can detect changes on surface elevations (if the soil is sinking). He stated, over time, it is hoped such monitoring would provide the sustainability figure that we are looking for.

Padre Dam Director Dixon further inquired how the groundwater was replenished. General Manager Bostad indicated that many of their productive wells come from the San Diego formation which is approximately 800 feet deep and such water is upwards of 15,000 years old. It must be determined how much of this water can be taken versus ocean water.

Padre Dam Director Dixon asked if Mr. Bostad had information on the zero liquid discharge for desalination. General Manager Bostad indicated that he did and asked Director Dixon to contact him following the meeting.

Otay Water District Director Larry Breitfelder inquired what volume was being considered from the South Bay Water Reclamation Plant to dilute the discharge. General Manager Bostad indicated that studies have not yet been done to determine that and that would be part of the feasibility study.

Rosarito Beach and Encina Desalination Projects:

General Manager Watton of the Otay Water District provided an update on the proposed desalination plant in Rosarito Beach, Mexico. Because of Otay Water District's proximity to the border, the district's board wished to strategically explore regional water opportunities with Mexico. If Mexico developed a desalination plant (in Rosarito Beach) there may be opportunity to develop a larger plant and bring a portion of the water from the plant across the border. CWA has done some studies and the cost is in-line with other proposed desalination plants for this region. He indicated that the water could be brought under a federal treaty

and that a Prop 50 Grant application has already been submitted for a matching \$250,000 grant to do more advanced feasibility studies on the proposed desalination plant. Both Otay and Mexico officials have indicated interest in pursuing the feasibility of the project further.

General Manager Watton also indicated that he wanted to provide an update on the Encina desalination issues. He indicated that the State Lands Commission has indicated that they wish to start eliminating the Once-Through Cooling (OTC) method. If this is the case, the advantage of a partnership with a power plant is not as beneficial as before as far as environmental research and impacts to the ocean environment. He stated that OTC will be a big issue with the Coastal Commission and the Encina plant will be difficult to push forward.

He indicated that there were many projects being discussed and he wished to raise the question of which projects the region should pursue to meet the 56,000 acre feet that CWA indicates the region requires. Should the region develop one large desalination plant or various projects among the member agencies. This is something that needs to be explored. He also indicated that CWA is in negotiations with Poseidon and the terms will probably be revealed by CWA sometime in June 2006.

General Manager Watton also noted that CWA has had cost overruns for some projects over the last year totaling approximately \$200 million. He indicated that CWA will need to review its CIP and update cost estimates, complete a rate analysis and project rates for the next 5 or 6 years. CWA should also look at what the local agencies are doing to increase their resource reliability and how it fits into the regions reliability. He stated that based on this analysis, determine how much reliability CWA could afford.

General Manager Bostad inquired if CWA has determined what would be considered reliable. General Manager Watton indicated that CWA did define some reliability issues through the agency General Managers and the CWA board process, but it should probably be reviewed once again.

4. Recycled Water Update:

Otay Water District:

Assistant General Manager Manny Magana of the Otay Water District provided an update on Otay's recycled water system 36" pipeline project. He noted that the existing system currently delivers 3.41 MGD of recycled water. He presented a slide showing the route of the new 36" pipeline and indicated that from the South Bay Water Reclamation Plant the pipe crosses three freeways (Interstate 5 and 805, and State Route 905) and has been completed up to Brandywine Avenue in Chula Vista. He stated that the pipeline is ahead of schedule and indicated that the project is funded through Otay's CIP expansion program. The total cost of the

project is \$42.7 million and the district has received a \$4 million Prop 50 grant and hopes to receive up to \$10 million in grant funding from the Bureau of Reclamation. Asst. General Manager Magana presented slides showing the various stages during the construction of the pipeline. He stated that to date, 20,703 linear feet of pipe has been installed and the pipeline is 65% complete. Construction is on schedule and it is expected that the pipeline will be completed in October 2006. The Recycled Reservoir and Pump Station are 30% complete and are expected to be completed in April 2007.

Director Robak, Otay WD, inquired when staff expects the new system to be in operation. Asst. General Manager Magana indicated that it is expected to go on-line in April 2007 and the new system will deliver approximately 6 MGD of recycled water.

Pilot Testing of Membrane Bio Reactors (MBR):

Mr. Jack Adams, an Engineer with Sweetwater Authority, presented an update on Sweetwater's recycled water program. He indicated that there were a number of projects occurring within their service area which has caused them to look at providing recycled water to their service area. He stated the projects included:

- The Duke Energy Plant (had indicated that they were proposing a redesign of their plant to utilize recycled water for cooling)
- The City of Chula Vista Bayfront development
- Cities of National City and Chula Vista "Smart Growth"

In response to such requests, Sweetwater Authority commissioned and completed a Recycled Water Master Plan in June 2005. Mr. Adams noted some issues staff would face in putting together their recycled water program:

- By law, the recycled water rate must be less than the potable water rate
- Annual cost of capital, and the operation and maintenance of recycled system must be sustained by recycled water sales and not by potable water rates
- Water quality must meet Department of Health Services standards
- Possible retrofitting of existing customers' plumbing
- Cost of new infrastructure (pipelines, pump stations and storage)

He stated that Sweetwater conducted a water assessment and determined that demand would total approximately 6,700 acre feet annually. He stated that the Duke Energy Plant's needs represented over half of the total annual demand. They also looked at a number of alternatives. An authority-wide system and a system west of Interstate 805, however, the cost per acre foot was too high at \$2,020 and \$1,833 respectively. The preferred alternative project (sharing the pipeline with Otay WD) would cost approximately \$29 million with a cost of approximately \$807 per acre foot which would be in the right range.

He noted the current status of discussions:

- Sweetwater has been meeting with LS Power (formerly Duke Energy) and the City of San Diego and there currently is no resolution to an agreement for the plant to purchase recycled water
- The City of Chula Vista has a 5 MGD wastewater capacity shortage with the Metro Sewer System and needs to address this issue
- San Diego County Water Authority recently completed a feasibility analysis for a region wide membrane bioreactor plant for recycled water
- Need to determine if Chula Vista's Metro Capacity deficiency can provide a source of recycled water to Sweetwater

Mr. Adams indicated that during the same time that Sweetwater was conducting its recycled water plant feasibility study, the City of Chula Vista was also conducting a wastewater study to respond to their wastewater shortage with Metro. They evaluated the cost of acquiring capacity in the Metro system versus the construction of a conventional wastewater treatment plant. They determined that acquisition of capacity in the Metro System was more cost effective at a cost of \$75 million versus the cost of building a treatment plant which ranged from \$70 to \$185 million.

Also, during the same time of Sweetwater and Chula Vista's studies, CWA received a grant to evaluate a region wide "scalping" plant. A scalping plant takes flow off the sewer, treats it and puts the solids back into the sewer system to be flushed down to the end of the line plant for treatment. They reviewed eleven sites and further evaluated the three most promising sites. One of the promising sites is located in the Sweetwater service area.

Mr. Adams showed a comparison between the conventional multi-step tertiary treatment process and the MBR treatment process. The MBR process was much more cost effective. It replaces the conventional clarification, aeration and filtration processes by combining the physical barrier characteristics of a membrane with biological treatment. This produces high quality effluent for discharge, reuse or recycle.

After CWA completed their MBR study, Sweetwater and Chula Vista agreed that the MBR process could work as an alternative solution to acquiring capacity from the Metro Commission. Both have agreed to study the system further.

He stated that first Sweetwater would need to determine that Sweetwater had enough recycled water demands to resolve the City of Chula Vista's Metro shortage. It was determined that Sweetwater demand was approximately 3.5 MGD and would need to meet 5 MGD (Chula Vista's capacity shortage). They approached Otay WD and with Otay's demand, it appears that they may be able to solve the City of Chula Vista's demand shortage through a possible MBR plant.

Sweetwater Authority and the City of Chula Vista have agreed to pursue a feasibility study and are working currently to obtain letters of commitment from the City Chula

Vista, LS Power and Otay WD. The next steps would be to obtain board and council approvals and prepare a RFP and select a consultant to complete the feasibility study. The goals of the study would be to:

- Verify recycled water demand analysis
- Determine appropriate MBR capacity
- Site the MBR
- Evaluate sewage flows
- Evaluate the recycled water distribution system structure
- Evaluate its economic viability

Asst General Manager Magana inquired if there was a MBR plant close by. Mr. Adams indicated that Sweetwater visited a plant in Corona, California. He stated that there are a number of plants within the region (Redding, etc). Director Robak inquired what was the scale of the plant presented. Mr. Adams indicated that a 6 MGD plant would require 4 acres to build whereas a conventional plant would require 10 to 16 acres. Director Robak also inquired what were the other two locations studied by CWA. Mr. Adams indicated that they looked at Olivenhain and the City of San Diego.

El Monte Groundwater Replenishment Project:

General Manager Mark Weston of Helix Water District indicated that their district has been working for years with a developer to build two golf courses on property their District owned in the El Monte Valley, east of Lakeside. He stated that the dewatered river bottom (approximately 500 acres) has been dry since the building of the El Capitan Reservoir in 1935. He stated that last summer, the golf course developer approached Helix about building a river restoration project in lieu of the golf courses. He stated that he would be providing an update of where they are with this idea.

General Manager Weston indicated the project was a cooperative feasibility project with Padre Dam MWD, City of San Diego, Endangered Habitats Conservancy (formed for this project) and El Capitan Golf Club (the City of San Diego and Padre Dam would supply the recycled water). This river restoration project can only proceed if the new habitat is supported by groundwater. He indicated that the plan is to bring in recycled water and treat it to a very high level which will raise the groundwater level in the riverbed to sustain plant life. He stated that the highly treated water would become a new water supply for Helix.

He reviewed some of the features of the plan. He indicated that they will re-grade the riverbed into a gentle sloping river bottom (it is currently flat) and the excess sand would be extracted and sold to pay for the project. Vegetation would then be planted in the new river bottom. He stated that they have studied bringing recycled water from the City of San Diego and Padre Dam MWD to the El Monte Valley. They reviewed three different pipeline alternatives from Padre Dam MWD and possibly tapping into the new pipeline the City of San Diego is contemplating on building to

bring recycled water to the San Vicente Reservoir. He stated that the water is treated to tertiary level, then through micro filtration, reverse osmosis and finally oxidized with ultraviolet light and hydrogen peroxide. He stated that it is very highly treated and only the water molecules are passing through the membranes. The treated water will then be placed in the ground (it is better quality than what is in the ground) and will then move two miles down river to the west end of the valley where it will be extracted and treated. Helix is looking to produce 500 AF which is about 10% to 15% of their water supply. It was noted that the price per acre foot will range from \$500 to \$100 per AF based on what the wastewater agency wants to charge Helix for the water.

General Manager Weston reviewed the timeline of the project and indicated that the feasibility study is just now being completed. He stated that it depends on the cost of the recycled water from the purveyor which is expected to be in the range of \$500 to \$1000 an acre foot. He stated that they expect environmental work to be done over the next two years and construction to commence in 2011. Feasibility will be determined by the economics of the project, however, there is a great benefit to the environment in restoring the San Diego River. He stated that the San Diego River Conservancy is very excited about this project as well as the environmentalists. He stated that Helix expects to have a completed feasibility study to present to their board sometime towards the end of May.

Sweetwater Authority Director Mitch Beauchamp indicated that he would like to see the agencies in attendance take a leadership role in supporting the acceptance of reclaimed water as drinking water without having to utilize projects such as this restoration project to mask the recycled water.

Sweetwater General Manager Dennis Bostad inquired if Helix will need to sell sand to contour the riverbed. Helix General Manager indicated that they would need to do so. He stated the total cost of the project was \$100 million and Helix expects to spend \$40-60 million and hopes to sell the sand to generate revenue for the project.

Otay Director Mark Robak indicated that he wished to comment on Director Beauchamp's remarks regarding the agencies in taking a leadership role with regard to reclaimed water. He stated that the City of San Diego's repurification study indicated that the preferred alternative is to build a pipeline to the San Vicente Reservoir. He indicated that in the 1990's the idea of utilizing reclaimed water as drinking water was not successful as it was labeled "toilet to tap." He stated that in reality, all along the Colorado River, wastewater is being placed in the river. He stated that the City of San Diego is looking for letters of support for their reclaimed project and thanked the agencies who have already forwarded letters of support. He stated that he felt that agencies do need to get behind their project.

5. Lakeside and Riverview Detachment from Padre Dam

Mr. Neil Brown, Director of Engineering and Planning of Padre Dam MWD, indicated that they are coming to the end of a three and half year project regarding the detachment of Lakeside and Riverview from Padre Dam. He indicated that the municipal service reviews, sphere of influence and the LAFCO detachment proceedings had taken much longer than they had anticipated. He stated that to complete the process, the mapping of the existing conditions, the new boundaries, and exceptions must be prepared for all three districts which they had not been aware of. This culminated in approximately 400 maps which must be approved by the County Assessor's Office, LAFCO and the State. He stated that the County Assessor's office has reported the changes to the County Auditors who must complete their tax roll changes prior to LAFCO approving the detachment and consolidation. He indicated that because of the size and complexity of the tax changes, the detachment will instead be presented to LAFCO's Commissioner meeting in July rather than June. He stated that after it is approved by LAFCO there must be a 30-day timeframe to allow for protests for the three agencies involved. If all goes as planned, the detachment / consolidation will be recorded by the State Board of Equalization in mid-August.

6. Annexation of Tribal Lands Update

Mr. Neil Brown indicated that Padre Dam MW was surrounded by four different Indian reservations (Barona to the North, Ewiiapaayp and Viejas to the East, and Sycuan to the South). He stated that they have been approached Barona about recycled water in the past, but have not heard back from them. The Ewiiapaayp had approached Padre, but has since been trying to work out gaming arrangements with Viejas. He stated that until they work out an arrangement, they do not expect to hear from them. Viejas is currently working with CWA regarding wheeling rights and have sent a RFP a couple months ago to study their future water needs.

They are currently working with Sycuan and have built a pipeline to serve a trust land development, Big Oaks, and are completing another pipeline to another trust land development adjacent to the Sycuan Indian Reservation. He stated that Padre Dam is currently dealing with water quality issues because there is not enough usage on the larger size pipeline that was installed to accommodate future development. They are currently working on agreements to assure that there is water turnover to maintain water quality. He shared with regard to the annexation of the Sycuan Reservation Land, that the same LAFCO process must be followed; municipal service reviews and a sphere of influence study which is just now being completed. He stated that rather than slow down the Riverview and Lakeside detachment/consolidation process, they are holding off annexing the Sycuan tribal lands until that process is complete.

Sweetwater Director Margaret Welsh inquired if Sycuan was currently not being serviced by Padre Dam. Mr. Brown confirmed that that was correct. Director Welsh inquired if the trust lands can be expanded. Mr. Brown indicated that they could purchase additional lands and petition the Government, Bureau of Indian Affairs, to grant the land into a trust. He stated that they must also work out how they would handle property tax rolls. Would they be included in the tax rolls so that they pay their fair

share? They must also address the fairness issue; how does that compare to school districts and other government tax exempt entities.

Director Robak indicated that Otay serves water to Dehesa Elementary School. He stated that they would like a tie-in, but there are some engineering challenges. He asked if Mr. Brown could address the challenges. Mr. Brown indicated that they believe that Sycuan is planning to purchase additional trust lands adjacent to where a pipeline would be built to the Dehesa Elementary School. He stated if Sycuan does purchase such lands, Padre Dam would request that they build the pipeline to the end of their property. By doing so it would shorten the pipeline required to serve the school.

7. Water Agencies' Standards Design Guidelines:

Mr. Hossein Juybari, Sr. Civil Engineer from Otay, indicated that standards guidelines is another example of cooperation between our water agencies. He stated that the committee was formed in April 2001 to create a uniform set of design guidelines for areas served by the member agencies. The committee chairmanship is rotated among the participating seven member agencies and is currently being chaired by Otay. He stated that they released an initial draft in September 2004. He stated that the City of San Diego and organizations in the private industry (Consulting Engineers and Land Surveyors of CA and John Harris of Hirsch & Co.) have participated in developing the guidelines. He indicated that the benefits of having a standards guidelines is it:

- Simplifies and standardizes the design process for all member agencies.
- Reduces design and construction costs
- Creativity is uniform
- Knowledge and ideas are shared which produces better ways of doing business

He stated the second draft, scheduled to be released later this month, will include 12 design sections which includes storage facilities, pressure control facilities and cost estimating. Sections will also be combined to achieve an improved overall guideline.

Mr. Juybari indicated that the third release will include microstation guidelines, seismic sensing devices, water pump station, sewer pump (lift) station and slip lining. Sweetwater Authority will take over the chairmanship of the committee in January 2007.

8. NCCP / MSCP Status Report

Mr. Rick Alexander, Director of Environmental & Governmental Services of Sweetwater, indicated that he would be providing a status report on the Joint Water Agencies (JWA) Natural Community Conservation Plan Program in which Helix, Padre Dam and Sweetwater are partners. He stated that the goal of the process is to put together a NCCP Plan which will provide "take authorizations" for covered and uncov-

ered species and their habitats through the water agencies so that they can address impacts to those species to either operations, facility development or simple management of an agencies' lands and programs over a 50 year period. The plan would permit water agency activities, such as, new project/facility siting, management of land and operations.

The JWA Subregional Plan will be the umbrella document and the Subarea Plans of each water agency will describe how each water agency will implement the NCCP Plan. He noted scheduled milestones for the NCCP Plan:

5/15/06: Final Review Drafts (SAP's, SRP, Conservation Analysis)

He stated the Conservation Analysis document is important as it describes in detail why listed species are covered and justifies the conservation action that the water agencies will take to obtain coverage for each species.

5/30/06: Draft Implementing Agreements will be completed

6/30/06: EIR / EIS, Framework Management and Monitoring Plans will be available for review

7/3 to 7/19/06: JWA Board approve Public Review of the Take Authorization Package

7/25 to 9/22/06: 60 Day Public Review period

11/1/06: JWA boards and FWS approve Take Authorization Package Submittal

11/8/06: EIF / EIS Hearing and Certification by Sweetwater Authority as lead agency

11/20/06: Submission of the Take Authorization Package to Wildlife Agencies

He stated that the Subregional Plan and Conservation Analysis was forwarded today to the Wildlife Agencies for their informal review.

He stated that CWA is also preparing a NCCP Plan which is on a similar schedule as discussed today. He stated that CWA has approved approximately \$600,000, over a three year period, to be passed to the Fish and Wildlife Service to fund dedicated staff positions to review the NCCP Plans (including the JWA plans) as they are received by the Fish and Wildlife Services. He stated that they must still discuss if the staff position is made available to review the JWA plans, how the cost will be shared. He noted that the boards at today's meeting should start thinking about this issue.

Mr. Alexander indicated that they have also been discussing with CWA the idea that CWA would be able to mitigate impacts of their projects on JWA partner lands which help the JWA finance the implementation of its plans.

He also noted that they are looking for potential new partners in the JWA and have approached Otay WD, Vista ID and Yuima WD in the east county.

The meeting was adjourned at 12:15 p.m.

AGENDA ITEM 6a

STAFF REPORT

TYPE MEETING:	Regular Board	MEETING DATE:	August 2, 2006
SUBMITTED BY:	David Burbeau, Safety and Risk Administrator	W.O./G.F. NO:	DIV. NO. 4
APPROVED BY:	Rom Sarno, Chief, Administrative Services		
APPROVED BY:	German Alvarez, Assistant General Manager, Finance and Administrative Services		
SUBJECT:	Rejection of Mr. & Mrs. Carter Claim		

GENERAL MANAGER'S RECOMMENDATION:

That the Board reject this claim in the amount of \$4,001.73

COMMITTEE ACTION: _____

See Attachment "A".

PURPOSE:

To reject this claim presented by Mr. & Mrs. Carter of 6656 San Miguel Road, Bonita CA. 91902. This claim alleges damage to numerous plumbing fixtures and items such as a refrigerator, hot water heater, hard wood flooring and numerous other items on May 31, 2006.

This claim was submitted for consideration on 7/12/06.

Staff and the District's property & liability insurance carrier, SDRMA, has recommended that this claim be rejected in its entirety. This claim is not due to any negligence or liability on the part of the District. This claim has been referred to the SDRMA claims adjuster for review.

This action is necessary in order to begin the statute of limitations for bringing any legal action in this matter.

ANALYSIS:

Mr. & Mrs. Carter claim that following a water main relocation project, excessive pressure caused the damage. It should be noted that in their written claim it is stated that their property is not protected by a water pressure regulator as "they never needed one".

Water System Operations was consulted and it was confirmed that proper procedure was followed by staff when the line was re-filled to control air and high pressure in the lines on 5/31/06.

The 185 pounds of pressure claimed by the Carters is reported to be within the normal pressure range in this zone.

The District is confident that the damage was caused by an absence of a required pressure regulator and other protective devices for the property by plumbing code and District Code of Ordinance.

It should be noted that the claim also includes \$2,015.64 for a new refrigerator. We are concerned about a claim for the replacement of an entire appliance that at best may have experienced a leak to the ice maker as opposed to the replacement with a new refrigerator. In addition, had the hot water heater been protected by both the required residence pressure regulator and temperature and pressure regulator valve on the appliance itself, the damage would have been prevented.

It should also be noted that this is the only property that has reported a problem from pressure.

The Districts Code of Ordinance states that customers must protect their property from damage. See excerpt below.

23.03 WATER PRESSURE REGULATION

A. Customer Responsibility. The District shall assume no responsibility for water pressure regulation within a customer's service area. The customer shall be responsible for providing adequate safeguard measures for the customer's water system wherever pressure regulation is necessary.

B. Requirement for Installation in New Construction. Customers making application for water service for new construction for residential, commercial or industrial use shall

be required to install an appropriate pressure regulation device for such service.

FISCAL IMPACT: _____

None.

STRATEGIC GOAL:

Protect the District employees, assets and community by continually improving sound risk management practices and safety programs.

LEGAL IMPACT: _____

None

General Manager

Attachment "A" Committee Action

Attachment "B" Copy of Claim by Mr. & Mrs. Carter

ATTACHMENT A

SUBJECT/PROJECT:	Rejection of Mr. & Mrs. Carter Claim
-------------------------	--------------------------------------

COMMITTEE ACTION:

The Finance and Administration Committee reviewed this item at a meeting held on July 21, 2006. The following comments were made:

- There was a water main relocation project scheduled on the day that the claimant had experienced the damage to their property;
- The claimants' admitted that their property was not protected by a pressure regulator and when the water was turned back on, the claimant alleges that numerous plumbing fixtures, their hot water heater, refrigerator, flooring and other items were damaged;
- It was discussed that normal pressure for the pressure zone in which the claimant resides is approximately 180 lbs. and the required pressure regulator would reduce the operating pressure within the home to a level no less than 75 pounds;
- The District's Code of Ordinances, Section 23.03, Water Pressure Regulation, states that customers are responsible to must protect their property from damage by installing an appropriate pressure regulation device;
- The customers affected by the relocation project were informed prior to commencing the project;
- The District's liability insurance provider recommends that the District reject the claim as the damage was not due to any negligence or liability on the District's part and rejection protects the District by limiting the time a claimant may file suit to 6 months as opposed to two years.
- The home was not very old, so the regulator may have been removed or never installed initially. Sometimes this is done to increase the water pressure to the property's irrigation system;

- It was noted that the District would be in a strong position should the claimant wish to litigate;
- There was discussion that the District did not have areas that were outside normal pressure levels, but does have areas that are at the high end of normal pressure levels;
- The committee suggested that an informational item on the requirement to have pressure regulators be included in the next customer "Pipeline Newsletter" as has been done in the past;

Upon completion of the discussion, the Committee supported staff's recommendation and forwarding to the Board of Directors on the consent agenda.

CLAIM AGAINST
OTAY WATER DISTRICT

JUL 12 2006

1. Name of Claimant(s):

KEITH & DIANE CARTER

Address of Claimant(s):

6656 San Miguel Rd, Bonita CA 91902

Phone No. 619-470-0432

2. Address to which claimant(s) desire(s) notice to be sent (if other than above):

6656 San Miguel Rd., Bonita CA 91902

3. Occurrence or transaction which gives rise to claim:

a) Date: ≅ 5/31/06 when water main was relocated on San Miguel Rd. Time: _____

b) Place: 6656 San Miguel Rd., Bonita CA 91902

c) Specify the particular act or omission you claim caused the injury or damage. Include a statement of why you feel the District or its employees were at fault.

PRIOR to the date when the water main was relocated
an employee of Otay Water District came by & talked to me,
saying they were relocating the Main & the water would be
turned off & there would be water available at the top of the road.

I asked him if I needed to do anything & would it cause
any differences. He said "No", there would be no difference & that (over)
4. General description of injury, damage or loss (so far as known as of the date of this claim):

Horse waterers broke; 3 toilets - valves damaged; Water heater -
blew hole in bottom; refrigerator - line blew, broke refrigerator &
leaked + damaged 1/2 of hardwood kitchen floor, Hot water dispenser - broke
Reverse Osmosis undersink system - broke, water damage to garage from broken
5. Name(s) of any District employee(s) causing injury, damage or loss, if known: hot-water heater

Unknown

6. a) Description of any property damaged:

See item 4

b) Name of any person(s) injured and description of personal injury:

None

7. Amount claimed if less than \$10,000. **Be sure to attach invoices or estimates to verify amount of property damage or statement from doctor or hospital for personal injury.** If the amount is more than \$10,000, indicate whether jurisdiction would rest in Municipal _____ or Superior Court _____.

a) Amount claimed as of date of claim: \$ 4001.73

b) Estimated amount of any prospective injury, damage or loss: \$ N/A

c) Total amount claimed: \$ 4001.73

8. Name, address and telephone number of witness(es) to the incident:

Keith Carter 619-470-0432, Diane Carter 510-637-2691

None

9. Any additional information that might be helpful in considering this claim:

Had the water district employee told us that there would be

an increase in water pressure or 185 pounds of pressure would be coming thru the lines we would have taken precautions.

I have read the statements made in the above claim and I know the same to be true of my own knowledge, except as to those matters stated upon information or belief, and as to such matters I believe that same to be true. I certify under penalty of perjury that the foregoing is true and correct.

Dated: 10/30/06

Diane Carter
Claimant or Authorized Representative

Keith Carter

I didn't need to do anything, except be aware there would be no water after 7:00 am. However, we had never had a regulator on our plumbing system, as we had never needed one. After the main was moved suddenly the water pressure ~~increased~~ & everything that had water going to it on our property Broke. ~~The water pressure increased dramatically.~~ increased dramatically. I called the water district + they sent out 2 inspectors to check it. They measured the water pressure at approx. 185.

AGENDA ITEM 6b

STAFF REPORT

TYPE MEETING:	Regular Board	MEETING DATE:	August 2, 2006
SUBMITTED BY:	David Burbeau, Safety and Risk Administrator	W.O./G.F. NO:	DIV. NO 3.
APPROVED BY: (Chief):	Rom Sarno, Chief, Administrative Services		
APPROVED BY: (Asst. GM):	German Alvarez, Assistant General Manager, Finance and Administrative Services		
SUBJECT:	Rejection of Mr. & Mrs. Ingham Claim		

GENERAL MANAGER'S RECOMMENDATION:

That the Board reject this claim in the amount of \$5,200.00

COMMITTEE ACTION: _____

See Attachment "A".

PURPOSE:

To reject this claim presented by Mr. & Mrs. Ingham of 9887 Ivy Street, Spring Valley, CA. 91977. This claim alleges that the damage to their landscape occurred sometime in September 2005.

This claim has been submitted for consideration on 7/06/06 nearly eight months after the alleged event.

Staff and the District's property & liability insurance carrier, SDRMA has recommended that the District reject this claim in its entirety. This claim is not due to any negligence or liability on the part of the District. This claim has been forwarded to SDRMA's claims adjuster for review.

This action is necessary in order to begin the statute of limitations for bringing any legal action in this matter.

ANALYSIS:

The District was notified of a leak by a previous claimant, Mr. St. Cyr in the vicinity of the fire hydrant on 9879 Ivy Street. A District crew was dispatched to evaluate the leak and make any necessary repair on 11/17/05.

The Utility lead responding to the leak reported and repaired a very small leak at the bottom of the 36 inch hydrant spool. He stated that water was observed in Mr. & Mrs. Ingham's yard located below grade of the leak at that time.

SDRMA has recommended rejection of this claim as it was unlikely this small leak caused the amount of landscape damage especially in light of the above normal rainfall in 2005.

A review with the District's Water Conservation Manager resulted in an opinion that if the leak was as small as described, it would not leaked more than 5-10 gallons a day. This amount would not be enough to cause the damage as claimed.

It is important to point out that in 2005; the San Diego area received greater than twenty inches of rainfall, more than twice the normal amount. Many yards experienced soil saturation, mold and mossy conditions during this time period.

It should be noted that following a small claims action and settlement with his neighbor, Mr. St. Cyr, the District received this claim from Mr. & Mrs. Ingham.

Given the fact that the leak was determined to be very small, the amount of excessive rainfall, the District is confident that the amount and scope of damage claimed by the Ingham's was not attributed to the fire hydrant service leak.

FISCAL IMPACT: _____

None.

STRATEGIC GOAL:

Protect the District employees, assets and community by continually improving sound risk management practices and safety programs.

LEGAL IMPACT: _____

None.

General Manager

Attachment "A" Committee Action

Attachment "B" Copy of Claim by Mr. & Mrs. Ingham

ATTACHMENT A

SUBJECT/PROJECT:	Rejection of Mr. & Mrs. Ingham Claim
-------------------------	--------------------------------------

COMMITTEE ACTION:

The Finance and Administration Committee reviewed this item at a meeting held on July 21, 2006. The following comments were made:

- Claimant alleges that his landscape was damaged due to a leak from a fire hydrant near his property;
- The District's staff repaired a small leak from the fire hydrant on November 17, 2005;
- The leak from the hydrant was estimated to be no more than 5-10 gallon per day . The District's Water Conservation Manager indicates that such a leak would not have been enough to cause the damage claimed;
- It was noted that the San Diego area had received record rainfall that year receiving more than two times the average annual rainfall (approximately 20 inches of rain) and many properties experienced many of the same issues as the claimants;
- It is believed that the landscape was not damaged due to any negligence or liability on the part of the District, but due to the heavy rains received during that time;
- It was noted that this claim was received following the settlement of a small claims action that the claimants neighbor brought against the District;
- The District's liability insurance provider recommends that the District reject the claim;

Upon completion of the discussion, the Committee supported staff's recommendation and forwarding to the Board of Directors on the consent agenda.

CLAIM AGAINST OTAY WATER DISTRICT

Dear Sir/Ms.,

Late last summer the fire hydrant next to our property began to leak underground, and the leak remained undetected for several months. Gradually, our front yard became a pond, and then the back yard also became water-logged. We lost three trees in the front, one tree at the back, many bushes, flower beds and ground cover. The front lawn became mossy and then moldy.

We had our sprinkler system checked by our landscape gardener, then had two independent consultants check pipes. The problem on our property still remained, with no visible source on our property or in the neighborhood. (We later discovered that our neighbor's driveway cracked, due, apparently, to ground subsidence.) Finally, we engaged a geologist to evaluate the ground and soil. He diagnosed a possible fire hydrant leak and we immediately informed Otay Water. It was only on their second visit that they finally discovered the leak, five feet underground.

I enclose a copy of the bills from the gardeners and the geologist, and a service quote for the restoration of landscaping at our property.

Sincerely,

Elaine Ingham

Be the Green Envy of the Neighborhood

Green Envy Landscape Maintenance and Design

Dear Ms. Elaine Ingham,

Thank you for giving us an opportunity to help you with your landscaping needs.

Per our conversation, please accept this letter as an estimate of services to be done on your property. ***Green Envy Landscape Maintenance and Design*** will be happy to help you with the following.

Labor to include

- Removal of current grass
- Pick up, delivery and installation of SOD
- Pick up, delivery and installation of plants
- Machine and equipment rental
- Labor for the above mentioned

Total cost to client: \$5,200.00

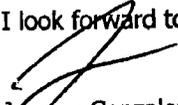

Date of service

Please contact me directly to discuss dates for work to be done. I can be reached at 858-344-9548 or at Greenenvylandscape@yahoo.com

Payments

50% (\$2,600.00) is due before work is to begin. Remaining balance of \$2,600.00 is due upon completion of services. Upon agreement to services, please sign and return the enclosed estimate with a payment of \$2,600.00 to Green Envy Landscape Maintenance and Design in the enclosed envelope.

I look forward to hearing from you,

Jeremy Gonzalez

AGENDA ITEM 6c

Ad Hoc Committee GM Salary Setting

TYPE MEETING:	Regular Board	MEETING DATE:	August 2, 2006
SUBMITTED BY:	Ad Hoc GM Salary Setting	W.O./G.F. NO:	DIV. NO.
APPROVED BY:	Gary Croucher		
APPROVED BY:	Jose Lopez		
SUBJECT:	GM Salary Recommendation		

AD HOC COMMITTEE RECOMMENDATION:

The General Manager salary for FY 2007 to be set at \$188,141.86 effective July 1, 2006.

COMMITTEE ACTION: _____

The Ad Hoc Committee met with the GM on June 23, 2006 at the direction of the Board to determine a salary change to take effect on July 1, 2006. At that meeting a salary negotiation was held with a successful result shown as the Ad Hoc Committee recommendation. On July 5, 2006 the Ad Hoc Committee issued an oral report of its findings to the Board with a recommendation to set the GM's salary at \$188,141.86 based on performance as reviewed by the full Board in June.

AGENDA ITEM 8

STAFF REPORT

TYPE MEETING:	Regular Board Meeting	MEETING DATE:	August 2, 2006		
SUBMITTED BY:	Mark Watton, General Manager	W.O./G.F. NO:	N/A	DIV. NO.	N/A
SUBJECT:	General Manager's Report				

GENERAL MANAGER:

- Update on the 30-inch Recycled Water Pipeline, 450-1 Reservoir, and 680-1 Pump Station Projects:
 - As of July 18, 2006, Ortiz Construction has completed the installation of 27,000 l.f. of pipeline of the 28,850 l.f. to be installed.
 - The pipe under Interstate 5 is complete.
 - Pumps have been installed and the pump station walls are under construction.
 - The reservoir floor and shell rings have been welded, and the roof is being constructed.
 - Final testing results of the pump's factory witness test have been received and accepted.

ADMINISTRATIVE SERVICES AND FINANCE:

Administrative Services:

- Four new hires started employment in the month of July: two Customer Service Representative I's, a Utility Worker I, and a Facilities Maintenance Technician.
- The District has retained Dan Cassidy, Attorney with Leibert, Cassidy and Whitmore, LLC. Mr. Cassidy will act as the District's Lead Negotiator for the upcoming negotiations for a successor agreement to be effective July 1, 2008. The goal is to have reached an agreement by December 31, 2006. Mr. Cassidy will meet with your Board on August 2, 2006, to discuss the direction for

negotiations with the Employees' Association. Mr. Cassidy's biography is attached.

- In preparation for negotiations, Human Resources is evaluating proposals for a Compensation Study to be conducted in conjunction with negotiations for a successor agreement. The study will evaluate the District's pay policies with other comparable agencies. The goal is to have the study completed before the conclusion of negotiations.
- Training will be scheduled for the middle of August for the various policies and procedures that your Board approved these past three months. The training will cover the Drug Free Workplace, DOT Drug Testing, Pay for Performance, Recruitment and Selection among others.
- 36 Otay customers picked up a weather "smart" controller at the distribution event held at the Water Authority on July 15th. Planning and marketing is underway for the next distribution event, tentatively scheduled in September.
- Almost 30,000 people visited the Garden this fiscal year, an increase of 34% from the last year. Much of this increase was attributed to the record Spring Garden Festival attendance.
- Otay staff helped the Garden create and teach the first ever Garden Summer Camp, which occurred during the week of July 10th.
- In the month of July there were 257 purchase orders issued for a total of \$4,356,505.45.
- The District received a claim in the amount of \$185.00 from Ms. Kim Baxter. After evaluation, it was determined that it would be appropriate to pay the claim. The claim relates to the repair of a toilet that was dislodged from its bolts following sewer cleaning activities in El Cajon. The air pressure from the Vactor Truck caused the toilet to rock and become dislodged. This is the first claim of this type from sewer cleaning activities. Conversations with the City of San Diego Metro Waste Water Division indicate that this is a fairly common occurrence during their cleaning activities. The vactor truck does maintain information regarding any areas that may be of concern and will further reduce pressure as necessary. There is little the District can do to prevent similar situations in the future as the pressure used for cleaning is kept as minimal

as possible while still allowing staff to accomplish the cleaning. A Release of Liability form has been sent to Ms. Baxter and a check will be sent as soon as the release is received by the District.

Information Technology and Strategic Planning:

- The field mobile computer solution is in testing. The District has received the 39 laptops and is in the process of loading software and testing. Deployment of the first 15 units is targeted for August to Operations.
- Staff is upgrading all conference rooms with a wide screen LCD panel and is installing a permanent computer to facilitate on-line use of District information.
- Staff hired a temporary GIS analyst that will start July 31. This position was approved as part of FY 07 Budget.
- IT staff has received extensive training in the use of database techniques and reporting skills in line with the emphasis in making information more understandable and accessible. New reports are being generated and distributed to clients as the Business Analysts become more skilled in producing reports.
- The FY07 Strategic Plan update will be issued in August with revised Strategic Plan Objectives for Development Services and Performance Measures for several Departments.
- We are adding new modules of Eden Software including Contract Management and HR Self-Service Applications. A specific timetable will be issued this month.
- The following table summarizes purchase orders issued during the month of July 2006 within staff signatory authority:

Date	Action	Amount	Contractor/ Consultant	Project
7/25/06	P.O.	\$24,850	DCSE	Temporary labor contract to provide support for GIS in GIS Supervisor's absence (maternity leave)
7/25/06	P.O.	\$20,000	ESRI	Temporary labor contract to provide support for GIS in GIS Supervisor's absence (maternity leave)

FINANCE:

- Policy Improvements - The finance staff continues its work to improve the policies governing the financial affairs of the District. As mentioned in last months bullet points, staff is working on revising the Debt Policy, the Investment Policy, and creating a Budget Policy. These are all expected to be brought to the Board before calendar year-end for review and approval. Staff is excited to move forward with these items as they continue on a path of improvements to round out the District's Financial Policies.
- IVR - Staff is making good progress on the Interactive Voice Response (IVR) system. Testing of the IVR system is complete and was successful. The "go-live" date is set for July 28th after which time customers will have 24/7 access to their account information.
- RFP for Actuarial Services - The District maintains a \$17 million fund to cover the retiree medical liability. The District is out in front of other agencies in its progressive approach on this issue. A few years ago, the Board approved the full funding of this reserve. The amount reserved was based on an actuarial study performed in April 2003. The District has stayed current with those estimates and after three years it is now time to reevaluate the estimated liability. The District has prepared an RFP for actuarial services and will be moving forward with the reevaluation over the next few months.
- RFP for Financial Advisor - Staff is preparing a request for proposal for a financial advisor. As mentioned in last months report, this year with the significant size of the pending debt issuance, staff will be looking for a Financial Advisor with significant experience in rating agency presentations. Staff is gearing up to present the District to the rating agencies with the expectation of a rating upgrade. While this is a bold statement, it is supported by the past four years of progress in the quality of the District's financial management. This progress is demonstrated by numerous awards, a sophisticated rate model, and a comprehensive Reserve Policy. Staff is working to further improve by certifying both the investment and debt policies. The District has excellent financial planning supporting the District's operational and financial objectives. The Board of Directors has championed this financial reformation not only with support

and direction, but also with the necessary rate increases to maintain financial strength.

- Special Assessments - Special Assessments are the source of \$2.8 million of revenues for the District, including availability fees and bond debt. Annually, the District provides the County with data defining each parcel to be charged and which charges apply. The file containing this data is due to the County by August 4th. Each year, the District sends all new customers a mailer defining the availability charges. These mailers were sent out in May. On July 5th, the Board approved the necessary resolution. Staff is anticipating that if the testing runs smoothly, the file will be ready to send to the County shortly after July 24th.

The financial reporting for investments for June 30, 2006 is as follows:

- The market value of the Portfolio Master Summary and the Investment Portfolio Details as of June 30, 2006, total \$76,315,626.89 with an average yield to maturity of 4.381%. The total earnings year-to-date are \$2,790,340.74. The effective duration is .372 of a year.

ENGINEERING, DEVELOPMENT SERVICES AND WATER OPERATIONS:

Engineering:

- Staff has received 4 new improvement plans from developers for potable/recycled plan check.
- The City of San Diego has signed the Cooperative Sub-Agreement and the USBR Title XVI Application. The Application and Cooperative Agreement have been sent to the USBR and they are routing the Cooperative Agreement and Application through their approval processing procedures.
- A Board of Directors Workshop on the Integrated Water Resources Plan has been scheduled for August 7, 2006.
- The San Diego County Water Authority was awarded \$250,000 for a feasibility study Proposition 50 Chapter 6(a) grant by DWR for the Regional Concentrate Conveyance Feasibility Study for Southern San Diego County. The total project cost is estimated at \$500,000 and SDCWA is prepared to pay the matching fund share of \$250,000.

Development Services:

- 100 meters were sold, generating \$1,064,287 in revenue. Total meters sold for FY05-06 were 829, which generated \$8,629,972 for the District.
- The Construction Division received 4 new projects to be constructed by developers and performed 3 pre-construction meetings.
- Approximately 9,300 linear feet of both CIP and developer project pipelines were installed since last month for a FY total of 135,520 linear feet. The Construction Division performed the quality assurance for these pipelines.
- The Sweetwater Springs Agency Interconnection project is 90% complete. The contract completion date is December 7, 2006.
- Approximately 11 hydrostatic pressure tests, 16 wet taps and tie-ins, 96 meter set inspections, and 11 project walk-throughs were performed.
- Two projects were accepted and 4 projects were released from warranty.
- 235 underground facility locations were located by the Survey Division.
- Efforts have commenced on revising the OWD Recycled Water Waste Discharge Permit revision necessary for the existing Ralph W. Chapman Treatment Plant and the new recycled water the District will receive from the City of San Diego. PBS&J consultants will assist the District in this endeavor.
- There were no purchase or change orders issued during the month of July 2006.

Water Operations:

- Water purchased for the month of June was 4,228.6 acre-feet. Beginning FY 05/06 to date, July 1, 2005 to June 30, 2006 there has been 41,426.60 acre-feet of water purchased. This is an 8.9 percent increase from the same period last year, July 1, 2004 to June 30, 2005.

- The AMR change-out program is progressing. The District's contractor, Underground Utility, Inc. (UUI), has replaced 2,695 RAMAR/Badger units as of June 30, 2006, leaving 4,316 RAMAR units still in use.
- There were 93 new Automated Meter Reading (AMR) meters installed, 187 meters were replaced with new AMR meters and 168 meter were retrofitted to AMR meters for the month of June for a total of 11,696 AMR meters.

Total number of potable water accounts is 46,949.

- Recycled water consumption for the month of June is as follows:

Total flow was 508.0 acre-feet or 165,463,584 gallons and the average daily flow was 5,515,453 gallons per day.

Total number of recycled water accounts is 558.

- Wastewater flows for the month of June were as follows:

Total basin flow, gallons per day: 2,161,000.
 Total Otay flow, gallons per day: 1,442,000.
 Flow Processed at the Ralph W. Chapman Water Recycling Facility, gallons per day: 1,253,000.
 Flow to Metro from Otay Water District, gallons per day: 190,000.

Total number of sewer connections is 6,053.

AGENDA ITEM 12

STAFF REPORT

TYPE MEETING:	Regular Board	MEETING DATE:	August 2, 2006
SUBMITTED BY:	Yuri A. Calderon, General Counsel	W.O./G.F. NO:	n/a DIV. NO. All
APPROVED BY: (Chief)			
APPROVED BY: (GM):	Mark Watton, General Manager		
SUBJECT:	Approve retainer agreement for general counsel and specialty legal services with Garcia Calderon Ruiz, LLP		

GENERAL MANAGER'S RECOMMENDATIONS:

Approve the form, and authorize the execution and delivery, of the attached retainer agreement with the law firm of Garcia Calderon Ruiz, LLP for general counsel and specialized legal services.

Authorize the General Manager to (i) execute one or more requests, in form and substance satisfactory to the General Manager, for the transfer of all District files, including electronic files, from Burke, Williams & Sorensen, LLP to Garcia Calderon Ruiz, LLP; and (ii) terminate the retainer agreement with Burke Williams & Sorensen, LLP, all effective August 1, 2006.

COMMITTEE ACTION:

Please see Attachment A.

PURPOSE:

Approve retainer agreement for general counsel and specialty legal services with Garcia Calderon Ruiz, LLP.

ANALYSIS:

The District's General Counsel, Yuri A. Calderon, and the District's Assistant General Counsel, Aerobel Banuelos, have informed the District that they are departing from Burke, Williams & Sorensen, LLP with thirteen (13) other attorneys, and will be forming a new law firm, Garcia Calderon Ruiz, LLP effective August 1, 2006. The new firm will have offices in San Diego, Los Angeles and San Jose. Effective August 1, 2006 Burke Williams & Sorensen, LLP will be closing its San Diego and San Jose offices.

The attached retainer agreement mirrors the current retainer agreement between the District and Burke Williams & Sorensen, LLP. The agreement includes the increase to the retainer for the cost of living adjustment contemplated in the Burke retainer agreement.

During the last fiscal year, the District utilized the retainer services to the fullest extent possible and exceeded the 1300 hour limit contemplated under the agreement. The legal services rendered by your General Counsel have successfully controlled the total legal costs for the District have resulted in an overall decline in legal fees over the last three years. We are also proud to inform you that the General Counsel has spent the majority of the last year providing preventative legal services instead of litigation and litigation management.

FISCAL IMPACT: There is no fiscal impact. The legal budget has been incorporated into the District's overall budget and has been approved by the Board.

LEGAL IMPACT: Garcia Calderon Ruiz, LLP will continue to provide the high level of legal services that the District has received since 2001. We look forward to the continued relationship with the District.

General Manager

Garcia Calderon Ruiz, LLP Retainer Agreement

ATTACHMENT A

SUBJECT/PROJECT:	Approve retainer agreement for general counsel and specialty legal services with Garcia Calderon Ruiz, LLP
-------------------------	--

COMMITTEE ACTION:

The Finance and Administration Committee reviewed this item at a meeting held on July 21, 2006. The following comments were made:

- Burke, Williams and Sorensen, LLP (BWS) has been providing legal services to the District since approximately 2001;
- Bonifacio Garcia was lead counsel for the district at that time and over the last two years, Yuri Calderon has taken over the lead counsel position;
- Over the last six to eight months, a difference in philosophy between the partners has developed on a number of different aspects related to the law firm. As a result, Bonifacio Garcia, Yuri Calderon, Rogelio Ruiz and two other partners from the San Jose area have decided to separate from BWS and create a new firm, Garcia, Calderon and Ruiz, LLP (GCR);
- The BWS Attorneys that provide legal services to the District will all be joining the new law firm;
- The Retainer will remain unchanged with the exception that rates for specialty work are a little higher as the volume of such work has reduced considerably in the last year. With lower volume, the firm cannot support the lower discount rates. There is also a minor revision with regard to the hiring of legal consultants. The contract allows counsel to work with the General Manager to hire consultants with an estimated contract cost up to \$50,000. If the costs are projected to or reach the \$50,000 threshold, the contract would be presented to the board for consideration and approval;
- The new Retainer would be effective August 1, 2006;
- It was discussed that GCR could provide the same services that BWS provided and it would be a seamless transition;
- GCR will have three offices: San Diego, San Jose and Los Angeles;
- Practice areas would be identical to BWS:
 1. Municipalities, Special Districts and Education
 2. Private, Real Estate & Construction
- The committee requested a survey of what other District's pay for their legal services and that counsel's "Legal Report" include the cost-to-date for each case.

Upon completion of the discussion, the Committee supported the retention of Garcia, Calderon and Ruiz, LLP with the additional survey information and recommended presentation to the Board of Directors as an action item for board discussion and consideration.

Garcia Calderon Ruiz, LLP

701 B Street, Suite 1790
San Diego, California 92101

July 17, 2006

Mr. Jaime Bonilla
Board President, Board of Directors
Otay Water District
2554 Sweetwater Springs Blvd.
Spring Valley, California 91978-2096

Re: Retainer Agreement for General Counsel and Other Legal Services

Dear Mr. Bonilla:

Garcia Calderon Ruiz, LLP is honored to serve as General Counsel to the Otay Water District (hereinafter, the "District"). This engagement letter contains the terms and conditions of the engagement of Garcia Calderon Ruiz, LLP (hereinafter, the "Firm") to represent the District as General Counsel and other matters assigned to us by the District. This Agreement will be effective as of August 1, 2006, subject to the approval of the Board of Directors of the District.

Business and Professions Code Section 6148 provides that a written fee agreement must set forth the scope of the legal services under which the attorneys of the Firm have been retained to perform and the fees the Firm will charge for those services. This letter, when executed by the District in the space provided below is intended to fulfill the requirements of Section 6148. Accordingly, the Firm hereby informs the District that the Firm carries errors and omissions insurance coverage applicable to the services to be rendered.

The terms and conditions of the Firm's representation of the District are as follows:

First, we are pleased to continue to serve as General Counsel for the District. In that capacity, we will provide all legal services reasonably required to represent the District's best interests in all matters forwarded to us for handling. We will keep the District informed of significant developments and promptly respond to all of its inquiries. For its part the District agrees to cooperate with us, keep us informed of developments and pay our bills and all costs incurred on its behalf in a timely manner.

Second, we will provide the services of General Counsel as outlined herein for a flat annual retainer fee of Two Hundred and Sixty-Two Thousand and Five Hundred Dollars and No Cents (\$262,500.00) plus costs. The General Counsel services will include advice and legal services in the areas of (1) General Administrative issues; (2) Governance, including Brown Act and California Public Records Act; (3) Personnel and Labor Relations; (4) contract review; (5) Board Advice; (6) management of litigation and coordination of legal services by

other law firms; (7) negotiation of water rights and other significant national and international contracts for the District; (8) handling all extraordinary legal issues or matters so long as the research and analysis does not exceed 100 hours; (9) legislative research and analysis under the same guidelines as handling of extraordinary matters; (10) all board briefings, meetings with board members, regular and special board meetings and occasional committee meetings when legal services are required; (11) six employee workshops on various legal topics; and, (12) periodic workshops and presentations to the Board of Directors on the Brown Act and Conflicts of Interest issues. The retainer shall include a maximum of 1300 attorney hours of retainer work for the District. In the event that the District reaches the cap of billable hours, the Firm will submit a proposal for the Board's consideration for services for the remainder of the District's fiscal year. The retainer shall be adjusted on an annual basis to reflect the Los Angeles-Riverside-Orange County, CA All Urban Consumer Price Index ("CPI"). The increase will take effect at the beginning of each fiscal year for the District.

The General Counsel shall provide the Board of Directors with period reports as to its activities and the litigation being supervised by General Counsel. The General Counsel shall maintain the Board President and the General Manager informed of all major legal developments and the status of all litigation matters. Furthermore, General Counsel shall no less than quarterly provide the Board of Directors with a written summary of all pending legal matters, including litigation matters.

The flat annual retainer shall not include services or advice rendered in connection with extraordinary events that exceed 100 hours of research and analysis, litigation, PERB litigation, arbitrations, including employee terminations, Auld Goff Course litigation and/or negotiations, litigation against any of the District's insurance companies to recover defense or indemnification claims (AIG/Kemper Litigation), Harron or Bartlett-May litigation (except routine reports to the Board of Directors), representation of the District before other governmental or regulatory agencies, and any and all costs which will be passed on to the District at no mark-up.

For legal services provided outside the annual retainer, the Firm will charge for these services at the rate of \$265.00 per hour for my time and the time of each other partner; \$250.00 per hour for special counsel or senior attorneys of the Firm with seven or more years of experience as an attorney. We will charge the District a blended rate of \$200 per hour for services provided by associates of the Firm who may work on District matters. Our practice is to provide legal services on the most cost-efficient basis possible. Not every legal task must be performed by an attorney. If a law clerk or paralegal can perform the work at a lower rate, a law clerk or paralegal will do the work. Our law clerk rate is \$175.00 per hour. Our paralegal rate is \$115.00 per hour. The rate for these services shall also be adjusted on an annual basis to reflect the Los Angeles-Riverside-Orange County, CA All Urban Consumer Price Index ("CPI"). The increase will take effect at the beginning of each fiscal year for the District.

Third, we will bill the District for legal services and costs on a monthly basis. The District agrees to pay the full amount set forth in our statements within 30 days. To the extent it does

not do so, however, the Firm shall be entitled to charge interest at the maximum allowable rate (currently 10% per annum) on any and all unpaid balances.

Fourth, the District recognizes that from time to time, it may be necessary to hire a consultant, expert, title company or other service reasonably necessary in our judgment to accomplish the tasks for which we have been retained. Prior to hiring a consultant, we will obtain the authorization and consent of the General Manager, if under \$50,000.00 and the Board of Directors if over \$50,000.00 in anticipated fees. In such cases, we reserve the right to advance payment on these costs or, in the alternative, to request the service provider/vendor to bill the District directly. The District agrees to reimburse us and/or pay service providers/vendors immediately when we have asked them to bill the District directly.

Fifth, the District recognizes that we may need to incur reasonable expenses to accomplish the tasks for which we have been retained. The District agrees to reimburse us for costs advanced on its behalf. These items may include, but are not limited to, filing fees, long distance telephone charges, electronic mail, messenger and other delivery fees, postage, photocopying at \$0.20 per page, outgoing facsimile transmissions at \$1.00 per page, parking, mileage at the IRS rate (currently \$0.405 per mile), travel expenses (including air fair at coach rates, lodging, meals, and ground transportation), charges for outside assisted legal research, charges for computer time and word processing time, clerical staff overtime, investigation expenses, and consultants' fees. We will, of course, itemize all costs incurred on each monthly statement.

Sixth, the District's appointment of the Firm as General Counsel for the District constitutes a public appointment and the Firm shall be an authorized agent of, and affiliated with, the District within the meaning of any and all policies of insurance covering the District, its agents, affiliates and others.

Seventh, the District may discharge us at any time, and it agrees to execute all documents reasonably necessary to complete our discharge. In the exercise of our sole discretion and consistent with the rules of ethics, we reserve the right to withdraw from representing the District in any matter and the District agrees to execute all documents reasonably necessary to complete our withdrawal. Conduct which may cause the Firm to withdraw includes but is not limited to (a) any refusal to cooperate with the Firm in a material matter; or (b) any fact or circumstance that would render the Firm's continuing representation unlawful or unethical.

Finally, we have not made and cannot make any promises or guarantees to the District or any of its officials, personnel or agents about the outcome of negotiations, litigation or any matter which it may ask us to handle, and nothing in this letter shall be construed as such a promise or guarantee. If the foregoing terms and conditions are satisfactory, please execute this letter in the space provided below.

Again, we appreciate the opportunity to continue to represent the District's interests and look forward to working with you. As always, should you have any questions, comments or concerns, please do not hesitate to give me a call.

Very truly yours,

Yuri A. Calderon
For Garcia Calderon Ruiz, LLP

On behalf of the Board of Directors of the
Otay Water District, I have read and am
authorized to agree to the foregoing:

OTAY WATER DISTRICT
