

## Private Home

Lakeside, CA 92040

This residential project treats roof runoff with Rain Saving to Gutter, Feature, and Container Best Management Practices. New gutters lead to a rain chain and rock garden in the front yard. Drought-tolerant landscaping surrounds the rock garden and provides overflow capacity. Rain barrels installed in the backyard treat runoff from the rear of the house and direct overflow away from the street.

### PROJECT OUTPUTS

- Area treated:  
**1,803 sqft of roof  
area treated**
- Storage capacity:  
**652 gallons of rainwater  
storage capacity in  
the rain barrels, rock  
garden, mulch, soil, and  
drought-tolerant plants**

### PROJECT OUTCOMES

- Rainwater prevented from  
flowing off the property:  
**9,400 gallons/year**
- Nitrogen reductions:  
**.36 lbs/year**

“This rebate future-proofed our house for the increased rain in San Diego. WRP staff assisted me in figuring out the best plan to capture as much rain as possible. In 2023, our house spent 18% less on water. This program allowed us to affordably upgrade our property.”

— RESIDENT

### UPGRADE YOUR LANDSCAPE TODAY!

The [Waterscape Rebate Program](#) provides rebates to homeowners and businesses in unincorporated San Diego to install landscaping features that save water, save money, and beautify their properties.
